Dear Hiring Manager,

I am a full-stack developer with 5+ years of experience building scalable web applications across e-commerce, B2B, and content platforms. I specialize in **React, Node.js, and headless WordPress architectures**, often leading projects end-to-end.

My first commercial React & Node.js project was e-multicontent.pl (2020). Since then, I have led production systems including:

- shroom4you.com – B2B headless WooCommerce (2024)
- powerenergy.com.pl – Large-scale B2B e-commerce (2023)
- hex-to-rgb.com – My Node.js-based product (~15k MAU)

Art Open (2020–2025)

Development of internal platforms and corporate B2C/B2B systems, initially built with React & Node.js and later migrated to my own headless WordPress solution.

Some of the corporate clients we worked for as part of Art Open:

- bekuplast.pl,
- alfalaval.pl,
- fortum.pl,
- rawlplug.com

Świeża Strona

Led full-stack implementations across the majority of projects presented in the agency portfolio: swiezastrona.pl/portfolio

I focus on performance, SEO, accessibility, clean APIs, and scalable architectures, often acting as a technical lead.

I would be glad to discuss how my experience can contribute to your team.

Kind regards,

Georgios Lazaridis
